this book aims to provide an overview of several topics in advanced differential geometry and lie group theory all of them stemming from mathematical problems in supersymmetric physical theories it presents a mathematical illustration of the main development in geometry and symmetry theory that occurred under the fertilizing influence of supersymmetry supergravity the contents are mainly of mathematical nature but each topic is introduced by historical information and enriched with motivations from high energy physics which help the reader in getting a deeper comprehension of the subject

this volume is an almost exhaustive review of what physicists are doing and intend to do for the future hadron colliders lhc and ssc in the field of calorimetry in high energy physics it is divided into two parts the first comprises a series of invited papers which illustrate the state of the art in the field the second is made up of contributed papers on calorimetry for lhc and ssc
